**Service Academies’ Admissions Requirement**

Satisfactory completion of the Candidate Fitness Assessment (CFA) is one of the requirements for admission to the United States Military, Air Force, Naval, and Merchant Marine academies. The CFA is a test of strength, agility, speed and endurance. It is used to predict a candidate’s aptitude for the physical program at the service academies. The results of this test are very important in the overall assessment of your admissions file, so you should become familiar with the six events in the CFA and practice. The examination consists of the following events: basketball throw from kneeling position, cadence pull-ups or the flexed-arm hang (women’s option), shuttle run, modified sit-ups, push-ups and a 1-mile run. A video of the push-ups and pull-ups/flexed arm hang events will be required for submission.

**Advice to the Candidate**

In order to qualify for admission to the service academies, you must take the CFA. You should remember that your score is a combination of your best efforts on each of the six events. Strive for excellence and the highest possible score.

It is your responsibility to arrange for a qualified person to conduct your examination, and an additional person to make a video of the required events. See the chart on this page that lists eligible CFA administrators. Your test administrator cannot be a relative or coach. You should enter the contact information for your tester online via your candidate portal. Your test administrator will receive an email with a link to the site where he/she will record your performance.

**Who Can Administer the CFA?**

- Physical Education Teachers
- Military Academy Liaison Officers
- Military Officers or Noncommissioned Officers
- Professors of Military Science
- J/ROTC Instructors

The six test events of the CFA are administered consecu-
tively with specified start, finish, and rest times. Candidates
should attempt to do their best on all six events, keeping in mind
that the events are sequenced to produce a cumulative loading
effect. In other words, after completing the first five events, it is
doubtful a candidate will score his/her personal best on the 1-mile
run. This has been considered in the development of the scoring
standards, which will be used to evaluate performance in each of
the six events. Candidates’ raw scores will be converted to scale
scores (0-100 points) based upon their performances in each
event. The 100-point maximum scores, by event and gender, are
listed in Table 1 (previous page). A candidate who achieves the
100-point level on any of the first five events should not attempt
further repetitions, as this will not improve his/her score.

**Test Administration**

The CFA is an important component of the admissions
process at each service academy and is used to determine if
candidates can meet the physical rigors of military life. The test
must be administered properly and to standard to accurately
reflect a candidate’s physical and motor-fitness and to be fair to
all candidates.

The CFA must be administered according to the directions
with strict adherence to the time schedule. At the completion of
each event, the test administrator must record the event informa-
tion on the last page of these instructions. At the completion of the
test, the administrator must complete the instructions provided in
the correspondence sent by email. By digitally signing the online
form, the test administrator is affirming the test was administered
to standard and the scores accurately reflect the candidate’s
physical performance.

Practice tests are encouraged to familiarize the candidate
with the pace and stamina required to complete the entire test
battery. However, the officially reported score must come from a
single test administration.

Thank you for your assistance in helping the service acad-
emies admissions offices obtain important test results that will
help determine a candidate’s qualification.

**Required Videos**

During the course of the record CFA administration,
candidates will be required to have a video made of the push-up
and pull-up/flexed arm hang events. These videos will need to be
made as the events occur in the record CFA. The videos cannot
be made by the official CFA administrator. Two separate videos
will need to be made: one for the push-up event and one for the
pull-up/flexed arm hang event.

**Video Instructions for the Candidate**

When filming, begin by clearly stating your whole name and
your candidate ID Number, while holding a piece of paper with
your name and candidate ID number written on it. Then show a
photo ID with your picture and your name. For this, you can use
your driver’s license or school ID. When performing your exercise,
be sure to film your whole body. It is important to see your hands
and feet at all times, and to keep your entire body in the frame.
The individual recording each video should be at a 45 degree
angle to the candidate.

**Support Personnel**

Additional personnel will be needed to facilitate the
administration of certain events, in particular the basketball
throw. It may also be prudent to have control and/or medical
personnel on site during the test; however, they are not
required. At a minimum, the test administrator will have an
emergency action plan for getting medical help if needed.
The test sequence will follow the order of the events listed below. The order of events cannot be changed. There are no exceptions to this sequence or timing.

</tbody>
</table>

The pull-up bar will be of sufficient height (approximately 8 feet tall) that the candidate’s feet will not touch the floor at full extension. The bar diameter will be no greater than 2 inches. The test administrator will prearrange the first five events prior to the start of the testing.

The 1-mile run is the last event administered in the CFA. Although it may be administered in an indoor gymnasium or stadium, an 8-minute time period has been allotted for transition to an outdoor track. Regardless of the 1-mile run course, the running surface will be flat and free of debris. In either the indoor or outdoor facility, it is imperative the 1-mile distance be measured accurately.

The test administrator will prepare the test site with the required equipment in advance of testing (Figure 1). The test administrator and assistant(s) will have a printed copy of the event order/ instructions and will be totally familiar with all testing procedures and time limits. The test administrator will announce the event instructions immediately before each event is performed. The test administrator will have a clipboard and an ink pen to record the results on the candidate’s scorecard and must maintain strict professional standards.

The following list of equipment is required to administer the CFA:
- 1 sit-up mat
- 1 100-foot tape measure
- 2 stop watches (minutes/seconds/tenths)
- 1 regulation men’s basketball
- 1 pull-up bar
- 1-mile flat running surface

Candidates should wear clothing and shoes that are appropriate for physical training, such as shorts, T-shirts, socks and running shoes (tennis/basketball shoes are not recommended for the 1-mile run). Any item that gives a candidate an unfair advantage is not permitted during the CFA. Wearing devices such as weight belts or elastic bandages may or may not provide an advantage; however, for standardization purposes, such additional equipment is not authorized unless prescribed by medical personnel. The only exceptions are appropriate cold weather apparel while running outdoors.

From a conceptual standpoint, the CFA is designed to be administered in two adjacent venues: an indoor gymnasium and an outdoor track. The gymnasium will be of sufficient size to permit testing the basketball throw. The space needed is approximately 100 linear feet (slightly longer than a regulation basketball court).

On test day, the candidate should be encouraged to spend 20-30 minutes in active warm-up and stretching prior to beginning the test. The test battery must be completed according to the time line instructions, and candidates are not permitted to warm-up, rest or practice other than during the time officially allotted. The test administrator will read these instructions verbatim to the candidate:

YOU ARE ABOUT TO TAKE THE UNITED STATES SERVICE ACADEMIES’ CANDIDATE FITNESS ASSESSMENT. THIS TEST WILL MEASURE YOUR MUSCULAR STRENGTH AND ENDURANCE, CARDIO-RESPIRATORY ENDURANCE AND MOTOR FITNESS. THE RESULTS OF THIS TEST WILL BE USED IN THE ADMISSIONS PROCESS AT EACH SERVICE ACADEMY BY DEMONSTRATING YOUR LEVEL OF PHYSICAL AND MOTOR FITNESS. LISTEN CLOSELY TO THE TEST INSTRUCTIONS. YOU MAY CEASE WORK WHEN YOU HAVE SCORED THE MAXIMUM FOR ANY INDIVIDUAL EVENT. OTHERWISE, DO YOUR BEST ON EACH EVENT. AFTER YOU COMPLETE EACH EVENT, THE TEST ADMINISTRATOR WILL RECORD YOUR RAW SCORE. IF AT ANY TIME YOU CANNOT CONTINUE TO MEET THE TIMED REQUIREMENTS, THE TEST WILL BE TERMINATED.
Testing Instructions

The following paragraphs describe the equipment, facilities, personnel, instructions, administration, timing techniques, and test administrator’s duties for each event.

Basketball Throw
The basketball throw measures ability to generate shoulder girdle power and total body coordination and balance from a stationary position.

The candidate must:
► Keep his/her knees parallel to and behind the baseline and on the floor during the event. May use a mat to cushion the knees.
► In an overhand throwing motion, throw a men’s basketball as far as possible (Figure 2). The non-throwing hand may be used to steady the ball before throwing, but only one hand can be used to throw the ball (e.g. no two-handed throws) (Figure 3).
► Not touch the floor beyond the baseline with any part of the body until the basketball has landed.
► Execute three trials within a 2-minute time period.

The test administrator will:
► Extend the 100’ tape measure the length of the testing area, perpendicular to the throwing baseline.
► Start the event at “0” minutes.
► Mark the point of impact with a pointer/yardstick for all three trials.
► Measure the perpendicular distance from the marked point of impact to the throwing baseline (Figure 4).
► Record the score to the nearest foot for the trial with the greatest distance.

Cadence Pull-ups
Cadence pull-ups measure muscular strength and endurance of the shoulder and back.

The candidate must:
► Mount the bar with a pronated grip (back of the hands facing the candidate) with arms fully extended in a “dead hang” (Figure 5).
► Not swing, kick or bicycle legs during upward movement.
► Raise the body until the jaw line is parallel to the ground and above the bar (Figure 6).
Return to a “dead hang” position to complete each repetition.

Execute each repetition in cadence (command).

The test administrator will:

- Start the event at 5 minutes.
- Before giving the command “GO,” ensure the candidate’s elbows are fully extended and shoulders are relaxed in a “dead hang.”
- If a candidate needs to use a chair to grip the bar, pull the chair away and take the time to ensure the candidate is in a straight-armed, relaxed shoulder “dead hang” before beginning. Do not allow candidates to jump off the ground or a chair to gain momentum for the first repetition. Require a short dead hang period before giving the command “GO.”
- On the command “GO,” start the event. When the candidate’s chin rises above the bar and is parallel to the ground, verbally announce the repetition number (e.g. 1, 2, 3 …). The verbal repetition number is the candidate’s cue to start the downward movement. When the candidate’s arms are fully extended in a dead hang position, give the command “UP.” At the end of two minutes, give the command “STOP,” and record the number of correctly executed repetitions.
- May steady the candidate when they are at the resting/dead hang position by extending an “arm bar” in front of the candidate, but must not be touching the candidate when he/she is attempting a pull-up.
- Monitor each repetition to ensure the candidate’s chin is parallel to the floor and “over” the bar in the “up” position and the arms are fully extended in the “down” position. Repeat the repetition count for any pull-up attempt that does not meet the standards (e.g. 1... 2... 3... 3... 3... 4).
- If a candidate reaches the maximum number of repetitions in less than two minutes (18 for men; 7 for women), give the command “STOP,” and record the maximum score. Otherwise, at the end of two minutes, give the command “STOP,” and record the number of correctly executed repetitions.

**FLEXED-ARM HANG (FEMALES)**

The flexed-arm hang is an alternative measure of muscular strength and endurance for women who are unable to execute one correct cadence pull-up. If a woman can successfully perform one correct cadence pull-up, it is to her advantage on the scoring scale to take the cadence pull-up test.

- Mount the bar with a pronated grip (back of the hands facing the candidate) with chin parallel to the floor and above the bar.
- Step off the platform
- Not swing, kick, or bicycle legs during the event.
- Maintain a flexed-arm position with chin above the bar and the jaw line parallel to the ground through-out the event (Figure 8).

The test administrator will:

- Start the event at “5” minutes.
- Give the command “GO” to start the event and the stop-watch
- Monitor body position to ensure the chin remains above the bar and the jaw line is parallel to the floor.
- Record the score in seconds/tenths of seconds.

**SHUTTLE RUN**

The shuttle run measures the ability to move rapidly while changing directions, which is an indicator of anaerobic power, agility, and quickness.

The candidate must:

- Begin the test with his/her entire body behind the start/finish line (Figure 9).
- On the command “GO,” the candidate will sprint 30 feet to the turnaround line. His/her foot and hand must simultaneously touch the floor on or beyond the turn-around line (Figure 10). The candidate will then sprint...
back to the start/finish line, touch on or beyond the start/finish line and turn, sprinting back to the 30-foot line.

► Execute two trials with a 1-minute rest between trials, and record the best of the two trials on the form.

The test administrator will:
► Start the event at 10 minutes.
► Measure the shuttle run course of 30’ from the baseline.
► Give the command “GO” to start the event and start the stopwatch. Monitor the candidate to ensure he/she touches on or beyond the turnaround line and the start/finish line with the hand and foot; failure to do so terminates the event.
► Stop the watch when the candidate crosses start/finish line on the second pass.
► Record the best of the two trials in seconds/tenths of seconds.

MODIFIED SIT-UPS

The modified sit-ups event measures abdominal/core body muscular strength and endurance.

The candidate must:
► Assume a supine (back on floor), bent knee position (approximately 90-degree angle) on a mat with arms crossed, fingers extended and touching the top of the shoulder with shoulder blades touching the floor/mat (Figure 11).
► Upon the command “GO,” flex from the hip, raising the elbows so they touch the front midpoint (or higher) of the thigh with the fingertips staying in contact with the top of the shoulders at all times (Figure 12); then recover by extending from the hip until the shoulder blades touch the floor/mat.
► Once the test begins, candidates may only rest in the “up” position with fingertips in contact with the shoulders at all times.

The test administrator will:
► Start the event at 15 minutes.
**Push-ups**

Push-ups measure upper body muscular endurance. The candidate must:

- Assume a prone (stomach toward the ground) position, supported by one knee on a mat or floor (Figure 14).
- On the command “GET SET,” assume the front-leaning rest position (arms extended) by placing your hands just outside the shoulders with fingers facing forward; your feet may be together or up to 12 inches apart. When viewed from the side, your body will form a straight line from your shoulders to your ankles (Figure 15).
- On the command “GO,” begin the push-up event by bending your elbows and lowering your entire body as a single unit until your upper arms are at least parallel to the ground (90 degrees); return to the starting position by extending your arms and raising your entire body as a single unit until your arms are fully extended (Figure 16).
- May rest in the “up” position, flexing or bowing the back as long as he/she does not lift a hand/foot off the floor, or touch any other body part on the floor. Must return to the straight body, front-leaning rest position before attempting another repetition.

The test administrator will:

- Start the event at 20 minutes.
- Give the command “GO,” and start the stopwatch for the 2-minute trial.

**1-Mile Run**

The 1-mile run measures aerobic capacity to do physical work. The candidate must:

- Assume a starting position behind the one-mile start line (Figure 17).
- On the command “GO,” the candidate will run continuously for one mile (walking is allowed, although strongly discouraged).

The test administrator will:

- Start the event at 30 minutes.
- Certify the one-mile run distance.
- Give the command “GO” and start the stopwatch.
- Monitor the candidate to make sure he/she does not:
  - Receive physical help during the event (pushed, pulled, picked up, or carried).
  - Leave the designated running course for any reason.
- Not permit pacing by another person.
- Stop the watch as the candidate crosses the finish line and record the score in minutes:seconds (e.g. 5:32).
