

1st Annual Minerva at West Point Workshop

The West Point Minerva Research Initiative hosted its first annual workshop at West Point on April 16th and 17th, which focused on the theme “Understanding Cultural Networks in Africa and Asia for National Security.” The Minerva initiative funds Universities and Service Academies to initiate research that can build a deeper understanding of the social, cultural and political dynamics that shape regions of strategic interest around the world. Beginning in 2010, the Office of the Secretary of Defense has partnered with a range of Defense educational institutions to launch Minerva Research Fellow programs at select Joint Professional Military Education schools. <http://minerva.dtic.mil/>.

Officials from Ft. Bragg’s Special Warfare Education Group, Civil-Military Operations Center and the Department of Geography & Environmental Engineering mingled on Monday evening’s boat ride.

The event began with a community-building boat cruise along the Hudson River and continued the following day at the Thayer Hotel with a series of keynote, plenary, and technical session presentations. Keynote speakers, Dr. John Nagl and Dr. Marcia Hartwell captured the overarching relevance of social sciences within the military. Both have been apart of the U.S. counterinsurgency initiatives and are Oxford Scholars. Dr. Nagl is currently the USNA Minerva Fellow and Non-Resident Senior Fellow from the Center for a New American Security and Dr. Hartwell is a Visiting Scholar from the U.S. Institute of Peace.

Discussion panels addressed each of the two Minerva research initiatives at West Point on Africa and Asia. The entire USMA Minerva Team was present at the workshop. Minerva Fellows, Dr. Makame Muhajir and Mr. Luke Gerdes incorporated their research within each panel session and Minerva Researcher; Ms. Kristine Ringler supported collaborations and coordination efforts.

Dr. Muhajir, Minerva Fellow

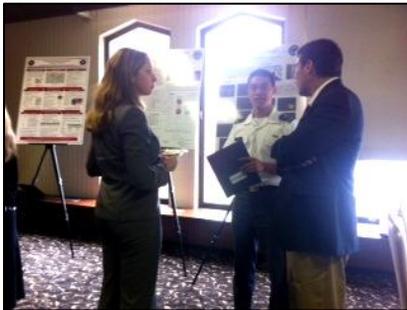

The Department of Geography and Environmental Engineering led the Africa panel which discussed models of socio-and-ethno cultural development, civil-military social networks and the stability of those networks, the politics of piracy in Somalia, and the realities of the HIV/AIDS epidemic. These topics were addressed through human geography research. The Department of Behavioral Sciences and Leadership led the afternoon panel with topics on social networks in a counterinsurgency, building cultural models and the rule of law in China, and an assessment of network analysis of Asian extremism. This panel focused on the evolution of social network structures within the Muslim

world to provide insight into how cultural norms and extreme ideologies are born and maintained.

1st Annual Minerva at West Point Workshop

Dr. Erin Fitzgerald from the OSD/Minerva Program, Dr. John Nagl, USNA Minerva Fellow and USMA's Cadet Jeff Yao discuss poster presentation research

The workshop developed inter-departmental partnerships and synergies within disciplines throughout the Academy and contributed to the Minerva and USMA missions. The event launched vital research efforts and built connections across academic departments at USMA and across the DoD Minerva community. The program provided the intellectual foundations for progress in understanding regional connectivity of people, information, and resources through social, cultural, and spatial dynamics.

Attendees were from various government agencies and academic institutions including the Army Research Institute “culture” group, Georgetown (dept of), ARO (director of Social Cultural Research). Feedback given by conference participants following the workshop were overwhelmingly positive and revealed an overall appreciation for both the West Point Minerva team’s research program and its efforts in executing the workshop. In the future, we intend to incorporate suggestions to increase the length of the workshop to allow for additional interaction with the assembled community of researchers.

Cadets Andrew Oswald and Robert Baxter present their posters during the Minerva Workshop, April 17th at the Thayer Hotel

During the poster session ten cadets presented projects related to the broad Minerva objectives. To underscore the truly multi-disciplinary nature of this initiative, cadets are from ten different academic majors including Management, International Relations, Math, History, Engineering Management, Economics, Portuguese, Sociology and Electrical and Mechanical Engineering. Project titles included “The Kashmir Peace Process: A Strategic US Interest” by Cadet Luke Hutchinson (International Relations) and “Modeling the “Hearts and Minds” in the Terrorism/Counter-Terrorism Struggle” by Cadet Jeff Yao (Math). Their research reflects projects being supported by the

West Point Negotiation Project, WP Network Science Center, as well Math and Sociology capstone courses. Going forward, the West Point Minerva team intends to engage in multiple collaboration opportunities, build its research agenda for two fieldwork studies, and bring junior faculty members and cadets into the team. Research trip plans for Tanzania and Indonesia for this coming summer and fall are underway and seminars will be offered to cadets that will bring real-time field data back to the classroom.
